

# **FISCAL NOTE**

## **SB 15 - HB 228**

February 14, 2003

**SUMMARY OF BILL:** Allows a local education agency (LEA) whose students construct, as part of a vocational/industrial curriculum, residential modular building units which shall be exempt from all licensure requirements provided:

1. The LEA constructs no more than one residential modular building per school year;
2. The modular building's structural and electrical systems are inspected by qualified building and electrical inspectors;
3. Each residential modular building meets all applicable local building codes and is inspected by local building officials as a site-built structure when installed as a permanent site;
4. The LEA provides the purchaser of the building with a statement disclosing that it does not comply with licensure requirements.

### **ESTIMATED FISCAL IMPACT:**

#### **Increase state Expenditures - Not Significant**

Under applicable case law such agencies (provided they are governmental entities) are already exempt from the licensing requirements.

Assumes any local government revenues collected from the sale of the building will offset any local government expenditures for materials and supplies used by the students to construct the residential modular building.

*For information purposes:* Since there will be no licensure requirements, the State Fire Marshal's Office would not be required to review building plans, nor collect the applicable fees for such plans reviewed. However, the Deputy Electrical Inspectors would continue to perform final electrical inspections as is currently required.

#### **CERTIFICATION:**

This is to duly certify that the information contained herein is true and correct to the best of my knowledge.

A handwritten signature in black ink, reading "James A. Davenport". The signature is written in a cursive style with a large, stylized initial "J".
